INNOVA EVO

Turkey & Chicken Formula Dry Cat & Kitten Food

Traditionally, dry pet foods required a significant concentration of grains and carbohydrate-rich ingredients to aid in the manufacturing of a crunchy kibble pet food. Natura challenged this tradition, and developed unique manufacturing processes to create the first-ever grain free, low carbohydrate dry pet food. Removing grains and dropping carbs leads to many benefits for our beloved four-legged friends.

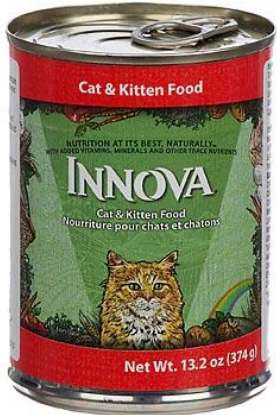

The protein in EVO is derived from premium quality meats that are highly digestible, highly palatable and provide maximum nutrient absorption. Fresh meats provide vital nutrients like amino acids (such as lysine and taurine), essential minerals, and other key building blocks that encourage strong bones and muscles.

Herring & Salmon formula

EVO Dry Cat Food is grain free. By removing ALL grain from the diet, EVO minimizes starch or carbohydrate intake while maximizing the concentration of protein. In fact, EVO provides high-quality protein at a level that is among the highest available anywhere. EVO cat and kitten foods are formulated with the highest quality meats, and whole fruit and vegetables are added to provide natural vitamins, minerals, fiber and phytochemicals.

Variety of Premium Can Food to be provided on daily basis

We include raw food in our cat's every day diet

Raw eggs – Egg Yolk only - ones or twice a week

Goat Milk only. NO cow milk

Raw beef – lean and fresh, cut in pieces.

Raw fish – fresh and cleaned of bones, ones a week

WATER in your pet dish (stainless steel preferable) should be changed every day.

Electric PET FOUNTAINS are recommended. They attract pet to drink more frequently. The water in fountain should be changed at least ones a week, filter changed monthly.
